Bounded RL vs controls (all initialised from the dev-selected M1 checkpoint) — mean over seeds [0, 1, 2], group-bootstrap 95 % CI; dotted = log-playback overlap reference — development set (checkpoint selection; not held-out)
clean joint minADE@6 (m)
core-suite joint minADE@6 (m)
overlap rate, 32 samples (%)
vehicle offroad fraction (%)
kinematically implausible (%)
diversity: mean pairwise FDE (m)
Joint (mixture-sel)
M1 + reward selection
M1 + extra SFT
M1 + filtered SFT
M1 + SOFT
M1 + bounded RL
